

Customized Education Program for Critical Infrastructure Environments

Our material is offered to Architects, Property Managers, Facility Managers, Building Engineers, Information Technology Professionals, Data Center Personnel, Electrical/Mechanical Technicians and Students in undergraduate, graduate, or continuing education programs. Our solutions provide relevant insight into the Mission Critical Environment with an emphasis on business resiliency, critical infrastructures efficiency, safety, and green power technology. Industry improvements, standards, and techniques are covered in our material and address the latest issues prevalent in the Mission Critical Industry. The material covers topics in the book “Maintaining Mission Critical Systems in a 24/7 Environment” and extends to our solutions, providing lesson discussions and advanced topics.

SmartTEAM™ – Training Education Awareness Methodology

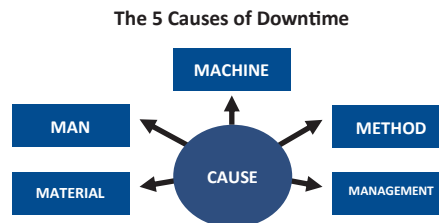

SmartTEAM™ is our new customizable education program utilizing the latest Learning Management System (LMS) tools. Our targeted knowledge transfer initiative aims to cultivate an environment to train professionals working in Critical Infrastructure Environments. We live in a world that operates 24/7. Critical Infrastructure Environments cannot afford any downtime—it reduces resiliency and operational efficiency. Overall, 65% of facility failures that cause downtime can be attributed to human error. Our tools standardize operational practices and behaviors throughout an enterprise. This in turn improves safety, reduces operational risk, increases operational/energy efficiency, and retains availability. Linking a focused SmartTEAM™ education and training initiative with our SmartWALK™ mobile application will improve safety, staff efficiency and reduce human error—all translating into significant return on investment. Best of all, the SmartTEAM™ education platform is available for on-the-go learning on any device any time!

Make your Team a SmartTEAM™:
Uniform Culture for all Staff

SmartTEAM™ provides education as a service to culture technical training in an interactive way. Our constantly evolving solution provides up-to-date materials that cover a diverse range of topics. Our solution is constantly enhanced each year based on changes in critical environment developments and is available to the students to facilitate continuous professional development and improvement throughout their career. SmartTEAM™ creates the foundation of training, knowledge transfer, awareness and methodology through 18 different topics and associated media, including:

1. Reliability & Resiliency
2. Energy Security
3. Critical Facilities & Green Technology
4. Electrical Maintenance & Safety
5. Standby Generators
6. Fuel Systems Design
7. Power Transfer Switches
8. Static Transfer Switch
9. Power Quality

10. UPS Systems
11. Cooling Systems
12. Cooling Systems Continued
13. Raised Access Floors
14. Fire Protection
15. Safe Electrical Maintenance & Procedures
16. Lockout/Tagout
17. Electrical Codes & Standards
18. Extended Topics & Advanced Methods
